

## Financial Benefits to the Community

### Midwest Generation's Fisk and Crawford power plants and their employees positively impact the local economy:

- Provide \$1.9 million in annual local property taxes to the city of Chicago.
- Pay \$1.1 million in annual payroll taxes.
- Donate \$400,000 to local charities and nonprofit agencies annually.
- Spend \$23 million annually with local suppliers and organized labor to support plant operations and maintenance activities during the year.
- Employ 235,000 man-hours of contract labor annually, among the largest in the building and construction trades in Chicago.
- Contribute \$30,000 in scholarships to local students annually.

Midwest Generation operations in Chicago provide economic benefits to the city and essential power to the electric grid.

Crawford Generating Station, located in Chicago's Little Village neighborhood, produces up to 542 megawatts of electricity.

Fisk Generating Station, located in Chicago's Pilsen neighborhood, produces up to 326 megawatts of electricity.
